GENERAL INFORMATION: Pepper Spray is a potent combination of garlic and white pepper. Apply Pepper Spray prior to or at the earliest onset of animal browsing or feeding. Repetitive applications may be necessary to maintain effectiveness after rainfall or as new growth occurs.

MIXING INSTRUCTIONS: Put 1/3 to 2/3 of total water volume in tank. **1.** Add pesticide(s) if desired and agitate until thoroughly mixed. **2.** Add Pepper Spray and agitate until thoroughly mixed. **3.** Add adjuvant(s) if desired and agitate until thoroughly mixed. Fill tank with remainder of desired water. A jar test is recommended for evaluating compatibility of Pepper Spray with multiple product mixtures.

USE RATES (FOLIAR): 1–2 pt/acre. If applying Pepper Spray alone with a fungicide or insecticide, an extender/sticker is recommended to give it longer-lasting effect. If tank-mixing with herbicides, do not add an extender/sticker, but add only a surfactant or water conditioner as an adjuvant. 10–15 gallons of water is the optimum amount of carrier per acre.

WARNING: Causes skin irritation. Causes eye irritation. **PREVENTION:** Wash face, hands, and any exposed skin thoroughly after handling. Wear protective gloves, protective clothing, eye protection, and face protection. **RESPONSE: If on skin:** Wash with plenty of soap and water. If skin irritation occurs, get medical advice or attention. Take off contaminated clothing and wash it before reuse. **If in eyes:** Rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do. Continue rinsing. If eye irritation persists, get medical advice or attention. See safety data sheet for further details regarding the safe use of this product.

STORAGE AND DISPOSAL: Store in a well-ventilated place. Keep cool. Store locked up. Dispose of contents/container to a licensed hazardous-waste disposal contractor or collection site except for empty clean containers, which can be disposed of as non-hazardous waste.
