Shake Well Before Using

GENERAL INFORMATION: Streamline is a spray adjuvant specially formulated to minimize drift, improve deposition and leaf wetting, and increase canopy penetration. Streamline reduces the number of driftable fines and results in a more uniform spray droplet size, which improves coverage on the intended target.

MIXING INSTRUCTIONS: Put 1/3 to 2/3 of total water volume in tank. **1.** Add pesticide(s) if desired and agitate until thoroughly mixed. **2.** Add adjuvant(s) if desired and agitate until thoroughly mixed. **3.** Add Streamline and agitate until thoroughly mixed. Fill tank with remainder of desired water. A jar test is recommended for evaluating compatibility of Streamline with multiple product mixtures.

USE RATE: GROUND: 4–6 oz/acre in 10–25 GPA. 8–10 oz/acre in 25–50 GPA. 10 oz/acre in 50–100 GPA. **AERIAL:** 2.5–4 oz/acre in 2–5 GPA. Do not add Streamline at a rate that exceeds 1% of the finished spray volume.
