Shake Well Before Using

GENERAL INFORMATION: ProShield is a scent and taste wildlife repellent designed to protect row crops, specialty crops, ornamentals, gardens, nursery stock, and forestry plantings from wildlife feeding and damage. When applied as directed, ProShield provides 8 to 12 weeks of repellency, even under heavy rainfall conditions. Its scent creates an effective barrier that discourages feeding, browsing, and antler rubbing. For best results, apply thoroughly to all vulnerable plant surfaces, including foliage, stems, shoots, trunks, and bark. Reapply every 8 to 10 weeks, or sooner if wildlife activity returns or rapid new growth develops. Fall applications may provide winter-long protection on Christmas trees and other woody ornamentals.

MIXING INSTRUCTIONS: Put 1/3 to 2/3 of total water volume in tank. **1.** Add ProShield and agitate until thoroughly mixed. **2.** Add the remaining water while continuing agitation. Do not tank mix ProShield with other products.

APPLICATION INSTRUCTIONS: Apply only when temperatures are between 35°F and 85°F. Avoid applications during direct sunlight or high heat conditions to minimize potential leaf injury. For best results, apply during early morning or late afternoon hours. Prior to large-scale applications, test ProShield on a small area of the target plant species to evaluate potential plant sensitivity. **Do not apply other products one week before or one week after applying ProShield unless compatibility has been confirmed.**

CLEANOUT INSTRUCTIONS: After application, thoroughly clean all spray equipment by rinsing the tank, pump, lines, and hoses with warm water and CleanOut or a limonene-based (citrus oil) cleaner.

USE RATES: Row Crops: Apply 1.5–2 pt/acre. Use up to 20 gallons of water per acre as the carrier. **Garden Fruits and Vegetables:** Apply 1.28 oz/gallon of water (1% v/v) to fruit trees, vegetable gardens, and other susceptible plants. ProShield may be applied up to the day of harvest for edible crops. **Christmas Tree Plantations, Forestry, Ornamental Trees and Landscape Plantings:** For dilution sprays, apply 1.28 oz/gallon of water (1% v/v) to ornamental plants growing in managed landscapes, Christmas tree plantations, and forestry plantings. Overapplication may temporarily affect the appearance of “blue” plant cultivars, such as blue Hosta. This effect is cosmetic only and does not impact long-term plant health. If concerned, treat a small test area and evaluate results after 24 hours prior to large-scale applications. **Food Plots:** Apply 0.64–1.28 oz/gallon of water (1% v/v) to reduce premature wildlife feeding in food plots, allowing crops to reach full nutritional value before grazing occurs.

KEEP OUT OF REACH OF CHILDREN: If exposed to eyes, rinse as a precaution. Avoid contact with skin, eyes, or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet.

FIRST AID: If in eyes: As a precaution, hold eye open and rinse slowly and gently with water for 15–20 minutes. Remove contact lenses if present, after the first 5 minutes, then continue rinsing. Call a poison control center or doctor for treatment advice. **If on skin:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15–20 minutes. Call a poison control center or doctor for treatment advice. Have the product container or label with you when calling a poison control center or doctor or going for treatment. For medical emergencies, call the poison control center at 1-800-222-1222.

ENVIRONMENTAL HAZARDS: The product is not considered harmful to aquatic organisms or to cause long-term adverse effects in the environment.

STORAGE AND DISPOSAL: Store ProShield in the original container in a cool, dry place away from children and pets. Protect from heat and freezing; store between 40°F and 90°F. Keep container tightly closed when not in use. In case of a spill, absorb with suitable material and dispose of according to local regulations. Nonrefillable container. Do not reuse or refill. Recycle if available or dispose of in a sanitary landfill. If partially filled, contact your local waste agency for disposal instructions. Do not pour unused product down drains.

CONDITIONS OF SALE: Seller warrants that the product contains the ingredients in the amounts stated on this label. THIS WARRANTY IS EXPRESSLY IN LIEU OF ALL OTHER WARRANTIES AND REPRESENTATIONS EXPRESSED, IMPLIED, OR STATUTORY, INCLUDING WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR USE. Timing, rate and method of application, weather and other conditions, mixtures with chemicals not specifically recommended on this label or any accompanying written recommendation are beyond the control of Seller. Buyer assumes all risks of use, storage, and handling of this material not in strict accordance with directions given herewith. In no case is Seller liable for consequential, special, or indirect damages resulting from the use or handling of this product. Buyer further agrees in the event of damages arising from the use of this product to accept a replacement of the product or a refund of the purchase price of the product, at Seller's option, as full discharge of Seller's liability. No one is authorized to make any other warranty, guarantee, or directions concerning this product, and no such warranties, guarantees, or directions shall be valid or binding upon Seller.
